

**LARGE, APICALLY-  
DOMINANT  
PLANTS WITH  
EXCELLENT  
SECONDARY  
BRANCHING**

**EXCELLENT  
TERPENE PROFILE**

**EARLY FINISHING**

**FULLY FEMINIZED  
PLANTS WITH  
VERY LOW  
HERMAPHRODITE  
RATE**

**GROWN ACROSS  
THE US IN 2019**

**THC COMPLIANT**

## **Socati C2**

### **Lineage: (Cherrywine x Cherrywine)**

This F1 feminized varietal originates from Cherrywine that was back crossed with a high performing Cherrywine phenotype to improve overall CBD yield, stability, and terpene profile.

Cherrywine itself originated from a cross of "The Wife" and "Charlotte's Cherries."

This work horse varietal is known for solid CBD generation in multiple climates while staying THC compliant during regular growth season. The bouquet has fruity overtones with a hint of musk. The plant grows 5 to 6 feet tall with strong apical dominance and an abundance of secondary branches. The plant exhibits good disease resistance and performs well on lower nutrient/irrigation regimes. Socati C2 does especially well in high sun environments and is an early finisher.
